INDEX FOR VOLUME 117

PAGE

Ali Khan, M. & Sun, Y. The marriage lemma and large anonymous games with countable actions 385

Arkowitz, M. & Silberbush, P. Some properties of Hopf-type constructions . . . 287

Armitage, D. H. The convergence of polynomial expansions of positive harmonic functions . 165

Aupetit, B. Spectral characterization of the socle in Jordan–Banach algebras . . . 479

Bator, E. M. & Lewis, P. W. Properties (V) and (wV) on $C(\Omega, X)$ 469

Bergweiler, W. Invariant domains and singularities 525

Byrnes, G. B., Sherring, J., Godfrey, S. E. & Prince, G. E. A generalization of the Liouville–Arnol'd theorem 353

Cassidy, C. & Lajoie, C. Genus of nilpotent groups of Hirsch length six 431

Čerin, Z. Equivariant shape theory 303

Chen, Y. On rational subgroups of reductive algebraic groups over integral domains . . 203

Chiappinelli, R. Compact embeddings of some weighted Sobolov spaces on $\mathbb{R}^N$ . . . 333

Darst, R. B. Hausdorff dimension of sets of non-differentiability points of Cantor functions . 185

Droste, M. & Göbel, R. McLain groups over arbitrary rings and orderings . . . 439

Eastham, M. S. P. Higher-order differential equations with a slowly decaying coefficient containing a periodic factor 175

Esterle, J., Zarrabi, M. & Rajoelina, M. On contractions with spectrum contained in the Cantor set 339

Eveson, S. P. & Nussbaum, R. D. An elementary proof of the Birkhoff–Hopf theorem . 31

Eveson, S. P. & Nussbaum, R. D. Applications of the Birkhoff–Hopf theorem to the spectral theory of positive linear operators 491

Göbel, R. & Droste, M. McLain groups over arbitrary rings and orderings . . . 439

Godfrey, S. E., Prince, G. E., Byrnes, G. B. & Sherring, J. A generalisation of the Liouville–Arnol'd theorem 353

González, M. & Gutiérrez, J. M. Unconditionally converging polynomials on Banach spaces 321

Gradolato, M. & Zimmermann, B. Extending finite group actions on surfaces to hyperbolic 3-manifolds 137

Guo, K. A representation of distributions supported on smooth hypersurfaces of R^n . . 153

Gutiérrez, J. & González, M. Unconditionally converging polynomials on Banach spaces . 321

Hayashi, C. Links with alternating diagrams on closed surfaces of positive genus . . 113

Hayman, W. K. & Rubel, L. A. Unavoidable systems of functions 345

Hudson, R. L. & Parthasarathy, K. R. Chaos map for the universal enveloping algebra of $U(N)$ 21

Komjáth, P. A note on minors of uncountable graphs 7

Kotschick, D. & Matić, G. Embedded surfaces in four-manifolds, branched covers, and $SO(3)$-invariants 275

Lajoie, C. & Cassidy, C. Genus of nilpotent groups of Hirsch length six 431

Lewis, P. W. & Bator, E. M. Properties (V) and (wV) on $C(\Omega, X)$ 469

Li, H. On the number of finite non-isomorphic Abelian groups in short intervals . . 1

Matić, G. & Kotschick, D. Embedded surfaces in four-manifolds, branched covers, and $SO(3)$-invariants 275

McKee, J. On the average number of divisors of quadratic polynomials 389

Mond, D. Looking at bent wires – $\mathscr{A}_e$-codimension and the vanishing topology of parametrized curve singularities 213

Morton, H. R. The coloured Jones function and Alexander polynomial for torus knots . 129

Murakami, H. Quantum $SO(3)$-invariants dominate the $SU(2)$-invariant of Casson and Walker 237

Navarro González, J. A. Differential spaces of finite type 371

Nussbaum, R. D. & Eveson, S. P. An elementary proof of the Birkhoff–Hopf theorem . 31

Nussbaum, R. D. & Eveson, S. P. Applications of the Birkhoff–Hopf theorem to the spectral theory of positive linear operators 491

Ohtsuki, T. Invariants of 3-manifolds derived from universal invariants of framed links . 259

Ohtsuki, T. A polynomial invariant of integral homology 3-spheres 83

Parthasarathy, K. R. & Hudson, R. L. Chaos map for the universal enveloping algebra of $U(N)$ 21

Peherstorfer, F. Zeros of linear combinations of orthogonal polynomials 533

Prince, G. E., Byrnes, G. B., Sherring, J. & Godfrey, S. E. A generalization of the Liouville–Arnol'd theorem 353

Rajoelina, M., Zarrabi, M. & Esterle, J. On contractions with spectrum contained in the Cantor set 339

Rhodes, F. & Williams, H. P. Discrete subadditive functions as Gomory functions . . 559

Rubel, L. A. & Hayman, W. K. Unavoidable systems of functions 345

Saeki, O. Studying the topology of Morin singularities from a global viewpoint . . . 223

Saito, K.-S. Generalized interpolation in finite maximal subdiagonal algebras . . . 11

Sakaki, M. Rigidity of superconformal minimal surfaces lying fully in odd-dimensional unit spheres 251

Saradha, N., Storey, T. N. & Tijdeman, R. On arithmetic progressions of equal lengths with equal products 193

Sherring, J., Godfrey, S. E., Prince, G. E. & Byrnes, G. B. A generalization of the Liouville–Arnol'd theorem 353

Silberbush, P. & Arkowitz, M. Some properties of Hopf-type constructions . . . 287

Snaith, V. P. Cyclotomic Galois module structure and the second Chinburg invariant. . 57

Storey, T. N., Tijdeman, R. & Saradha, N. On arithmetic progressions of equal lengths with equal products 193

Sun, Y. & Ali Khan, M. The marriage lemma and large anonymous games with countable actions 385

Tijdeman, R., Saradha, N. & Storey, T. N. On arithmetic progressions of equal lengths with equal products 193

Vesanen, A. Finite classical groups and multiplication groups of loops 425

Wall, C. T. C. Quartic curves in characteristic 2 393

Wall, C. T. C. Geometry of quartic curves 415

Williams, H. P. & Rhodes, F. Discrete subadditive functions as Gomory functions . . 559

Yokota, Y. On Quantum $SU(2)$ invariants and generalized bridge numbers of knots . . 545

Zarrabi, M., Esterle, J. & Rajoelina, M. On contractions with spectrum contained in the Cantor set 339

Zhang, D.-Q. Algebraic surfaces with nef and big anti-canonical divisor 161

Zhu, K. Evaluation operators on the Bergman space 513

Zimmermann, B. & Gradolato, M. Extending finite group actions on surfaces to hyperbolic 3-manifolds 137
